PROFESSIONAL CARD
FOR SURVEYORS**

EurGeo ELECTRONIC PROFESSIONAL CARD FOR SURVEYORS

Background

- *EGoS created a passport system for Surveyors in 1996*
- *In 2001 the passport was re-addressed and a proposal for the passport to be electronic and available on line was considered.*
- *At that stage there was still a demand by original passport holders for renewal.*

- *The problem with the EurGeo passport scheme was that the majority of Member States were unable to recognise it and therefore Members of EGoS were unable to sign-up to the scheme.*

- *The scheme was held in abeyance.*

- *In recent times the EU Commission has pressed the Professions to develop their own standards for recognition of Professional Qualifications.*
- *The EU Commission, published the General Directive for Professional qualifications 2005/36/EC followed by a number of amendments.*

- *Engineers had produced a professional registration card for use by structural engineers that had been used for a number of years and this had been recognised by some Engineering Organisations in 30 countries including European Member states and known as Eurlng*

- *The “Professional card” system, therefore, has been identified by the EU in their recent studies published in December 2011, as an acceptable vehicle to register the individual and their professional qualifications and their ability.*

- *Responsibility of European Organisations, such as EGoS to develop a system for recognition of Professional qualified Surveyors.*
- *Reasonable to adapt the existing EurGeo passport system into an electronic Professional card system.*

Registering;

- *Name and personal details*
- *Professional surveyor's qualifications.*
- *Employment history & Experience*
- *Registration to Surveying Professional Institution, Government body or Chamber.*

Responsibility of EGoS Members;

- *To confirm the applicants details are correct.*
- *Inform the EGoS registrar*
- *To provide additional training for a Migrant Surveyors in order to allow the migrant surveyor to become a member of the profession in the host State.*

EurGeo Registration.

- *Provided a central registration system.*
- *Provide a EurGeo card & identity*
- *Keep on line for access, details of the professionals education and work experience.*
- *Provide an appeal system.*

Listing card holders on internet;

- *Education, training & experience available to interest parties*
- *Information provided has been authorised by the card holders professional body .*
- *Web site search engines will be able to identify location, job description and competence.*
- *Provides publicity for card holder*
